kyhealthnow and the Medical Provider

Kentucky Department for Public Health
WV Health Innovation Collaborative Quarterly Meeting
Charleston, West Virginia
September 11, 2015
Factors That Affect Health:

- **Socioeconomic factors**
- **Changing the context**
  - To make individuals’ default decisions healthier
- **Clinical interventions**
  - Long-lasting protective interventions
- **Counseling & education**

**Examples**

- Individual education for health behavior change
- Medication for high blood pressure, high cholesterol, diabetes
- Immunizations, brief tobacco intervention, colonoscopy
- Fluoridation, smoke-free laws
- Poverty, education, housing, inequities

Source: Centers for Disease Control 2014 Kentucky SOAR Meetings
What is kyhealthnow?

- Created in February 2014 by Executive Order 2014-114
- Targets seven major health goals (health insurance, smoking, obesity, cancer, cardiovascular disease, oral health, substance abuse/mental health)
- Includes multiple strategies to help achieve these goals by the year 2019
- Established an Oversight Team to monitor and efforts of the initiative and carry out the strategies needed to achieve the goals. This Team includes representatives from each Executive Branch Cabinet and key agency in the administration
2019 Goals

• Reduce Kentucky’s rate of **uninsured individuals** to less than 5%.
• Reduce Kentucky’s **smoking** rate by 10%.
• Reduce the rate of **obesity** among Kentuckians by 10%.
• Reduce Kentucky **cancer** deaths by 10%.
• Reduce **cardiovascular** deaths by 10%.
• Reduce the percentage of children with untreated **dental** decay by 25% and increase adult **dental visits** by 10%.
• Reduce deaths from **drug overdose** by 25% and reduce by 25% the average number of poor **mental health** days of Kentuckians.
Reduce Kentucky’s rate of uninsured individuals to less than 5%.

Reduce Kentucky’s smoking rate by 10%.

One of CDC’s “Winnable Battles”
Reduce Kentucky’s smoking rate by 10%.

**Expand tobacco-free policies to more executive branch property.**

- Executive Order 2014-747, effective November 20, 2014
- 5th state to institute such a policy
- 33,000 employees, hundreds of thousands of visitors
- 2,888 state-owned buildings, more than 26.4 million sq. ft.

**Support legislation to ban the sales of e-cigarettes to minors.**

- SB 109, adopted during the 2014 Regular Session
- Prohibits the sales of all types of e-cigarettes to minors, regardless of whether the devices use nicotine.
- Kentucky became one of 40 other states who also prohibited the sale of e-cigarettes to minors

Kentucky Counties and Communities
Smoke-free Law Protections
32.5% of Kentuckians are protected by comprehensive local smoke-free ordinances
• ACA Cessation Benefit Standard: prescription coverage varies by plan as do potential barriers to cessation coverage.
• Smoking Cessation programs offered via all local health departments
• Quit Now Kentucky (FY 2015)
  – Call volume of 6,642 calls
  – 65,390 text messages sent to encourage and remind clients
  – Nearly 4 out of 10 calls from clients with Medicaid
  – Providers referrals can be made through an established fax procedure or through the website at [www.QuitNowKentucky.org](http://www.QuitNowKentucky.org).

### Kentucky Heart Disease Death Rates, 2009-2013

![Map of Kentucky Heart Disease Death Rates, 2009-2013](image)
Reduce Cardiovascular Deaths by 10%.

Support the ongoing efforts of the Kentucky CARE Collaborative, a statewide effort designed to provide blood pressure awareness education within communities.

- 2014 annual count shows 20,430 educational encounters
- 2,445 blood pressures improved to healthy zone
- 46 participating partner sites
- Each one of these numbers is a significant increase from the 2012 annual count

Continue efforts to lower sodium intake in government-regulated facilities, given the link between sodium intake and cardiovascular disease.

- 3 State cafeterias now offer Better Bites Options one day each week
- Cabinet for Health & Family Services, Capitol Annex, and Transportation Cabinet
- Requires each entrée to have less than 500 mg of sodium

Source: St. Elizabeth Healthcare NKY CARE Data Collection Tool, 2015; KY Department for Public Health Obesity Program, 2015
Reduce the percentage of children with untreated dental decay by 25% and increase adult dental visits by 10%.

**Increase pediatric dental visits by 25% by the end of 2015.**
- Medicaid claims data show an increase from 255,831 children receiving dental visits in 2013 to 265,232 in 2014.

**Partner with Managed Care Organizations to encourage increased utilization of dental services.**
- Over 800,000 total claims were submitted via Medicaid for dental services in 2014.
- A total of $18,075,000 was paid in revenue from Medicaid expansion to dental providers.
- Over 115,000 preventive dental services were provided to expansion members.
Reduce the percentage of children with untreated dental decay by 25% and increase adult dental visits by 10%.

Public Health Registered Dental Hygiene Program:

- Five local health departments (Lincoln Trail, Jessamine, Pike, Purchase, and Lawrence) funded through the 2014-2016 biennial budget as enacted by the 2014 General Assembly.

- Since starting the program approximately 2,600 patients have been seen and over 15,000 services have been provided.

Age-adjusted drug overdose death rate by state, 2013

Source: CDC, National Center for Health Statistics. Multiple Cause of Death 1999-2013 on CDC WONDER Online Database, released 2015.
Epidemiology of Hepatitis C in Kentucky:

- For 2013, Kentucky reported the highest rates of acute hepatitis C in the nation: 5.1 cases per 100,000.
- Acute hepatitis C rates in Kentucky *doubled* between 2010 and 2013.
- Though highest numbers of acute cases are found in the state’s urban areas, rates are also increasing in rural areas.
- Half of all acute hepatitis C cases in 2014 in Kentucky were in the 21-30 year age group.
- An estimated 50,000 Kentuckians live with chronic hepatitis C.
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.

*Case counts in 2014 are preliminary.
Data Source: National Electronic Disease Surveillance System. Confirmed cases of Kentucky residents.
Data current as of July 14, 2015.
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.

Hepatitis C and Drug Abuse in Kentucky:

- Injection drug use is #1 risk factor for hepatitis C.
- In 2013, Kentucky had the second highest age-adjusted drug overdose mortality rate.
- From 2011 to 2014, hospitalizations in Kentucky for neonatal abstinence syndrome doubled.
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.

Increasing Hospitalizations for Neonatal Abstinence Syndrome in Kentucky

Kentucky Resident Neonatal Abstinence Syndrome Hospitalizations, 2000-2014

Produced by the Kentucky Injury Prevention and Research Center, June 2015. Data source: Kentucky inpatient hospitalization discharge data, Office of Health Policy. Data for 2011-2014 are provisional and subject to change.
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.

Rising Heroin Drug Overdose Rates in Kentucky

Age-Adjusted Rate for Drug Overdose Deaths Involving Heroin, 2009-2013

Produced by the Kentucky Injury Prevention and Research Center, February 2015. Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. Multiple Cause of Death 1999-2013 on CDC WONDER Online Database, released 2015.
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.

Harm Reduction & Syringe Exchange Program (HRSEP):

- SB 192 enacted on March 24, 2015; Optional program
- Allows for local health departments (LHDs) to operate a substance abuse treatment outreach program which allows participants to exchange hypodermic needles and syringes. Must have approval of the LHDs Board of Health, city and/or county governments prior to program implementation.
- KDPH convened a workgroup of stakeholders including LHD leadership, hospitals, the Justice Cabinet, the Department for Behavioral Health and Developmental and Intellectual Disabilities, Centers for Disease Control and Prevention, and Public Health leadership.
- Guidance provides a framework for LHDs to develop their own protocols and implement a HRSEP program in their community.
- No federal funds can be used; no state general funds available.

**Program Goals:**
- Provide clean needles for exchange and access to dispose of dirty needles
- Provide access to screening and testing for bloodborne pathogens (HIV, Hep B & C)
- Provide access to community resources including substance abuse treatment
Reduce deaths from drug overdose by 25% and reduce by 25% the average number of poor mental health days of Kentuckians.

**Expand access to naloxone by 100% among first responders and medical professionals to enable rapid administration of this life-saving treatment.**

- Pilot naloxone rescue kits project via the University of Louisville Hospital, University of Kentucky Hospital in Lexington, and St. Elizabeth Hospital system in Northern Kentucky.
- Kits are provided free of charge to every treated and discharged overdose patient.
- Expected to save the lives of at least 200 Kentuckians.

**Create a more comprehensive and open access behavioral health network and increase by 25% the number of behavioral health providers eligible to seek reimbursement from Medicaid by the end of 2015.**

- More than 300 new behavioral health providers have been added to the network in 2014.
- More than 670 Medicaid providers rendered substance use treatment services for Medicaid members in 2014.
